

# DataLab

Grow Your Own Psychology Data

Gordon Wright & Bence Palfi

16 January 2026

# **Welcome to PS50008A**

# Research Methods & Experimental Design

Your first session of the module

# What is DataLab?

Today you generate the dataset we analyse all term.

- You'll be both **participant** and **tester**
- Work in pairs
- Follow your **sequence card**
- Complete 5 tasks + memory test

# Session Overview

| Time        | Activity                                     |
|-------------|----------------------------------------------|
| 10:00–10:25 | Welcome, Part 1 survey, Memory Test          |
| 10:25–11:25 | Complete 5 tasks (follow your sequence card) |
| 11:25–11:35 | Part 2 survey & wrap-up                      |
| 11:35–11:55 | Data Dictionary preview and discussion       |

# What You'll Do

1. Complete Part 1 survey (demographics, mood, personality)
2. Do the **Memory Test** together
3. Follow your **sequence card** through 5 tasks
4. Complete Part 2 survey

# Part 1: Getting Started

# Get Your Materials

1. Collect your **lab notebook** (with your number)
2. Form into pairs (at least) max group size 4!
3. Collect a sequence card from your lab instructor

# Complete Part 1 Survey

Scan the QR code below or open the link on the VLE:

**[Qualtrics link displayed here]**

Complete:

- Consent
- Sleep & lifestyle
- Current mood
- Personality (TIPI)
- Demographics

# Memory Test

# Mind Palace

We do this **together** as a group.

Two word lists on screen:

- **LEFT** = List A
- **RIGHT** = List B

Your instructor tells you which side.

# The Procedure

1. **STUDY** (30 sec) — memorise YOUR list
2. **DISTRACT** (60 sec) — maths problems
3. **RECALL** (90 sec) — write on paper
4. **RECORD** — enter in Qualtrics

# Ready?

Your instructor will say:

**“Look LEFT” or “Look RIGHT”**

Have pen and paper ready!

# STUDY: Lab 304A (Mozart)

00:30

## LEFT

WISDOM

COURAGE

JUSTICE

FREEDOM

PATIENCE

LOYALTY

BEAUTY

SPIRIT

HONOUR

TRUTH

## RIGHT

HOPE

ANGER

FAITH

POWER

GRACE

VIRTUE

DREAM

PEACE

KNOWLEDGE

SOUL

# STUDY: Lab 304B (Silence)

00:30

## LEFT

APPLE

TABLE

CHAIR

RIVER

MOUNTAIN

GUITAR

CLOCK

PENCIL

FLOWER

BOOK

## RIGHT

WINDOW

RABBIT

JACKET

CANDLE

LADDER

BASKET

HAMMER

PILLOW

GARDEN

BOTTLE

# DISTRACT

01:00

**Maths problems — no calculator!**

$$7 \times 8 = ? \quad 15 + 27 = ? \quad 64 \div 8 = ?$$

$$23 - 9 = ? \quad 6 \times 9 = ? \quad 81 \div 9 = ?$$

$$12 + 38 = ? \quad 45 - 17 = ? \quad 8 \times 7 = ?$$

# RECALL

**Write your words on paper!**

Don't look at the screen.

01:30

# Record Results

In Qualtrics, enter:

- Words recalled (0–10)
- Which positions you remembered
- Any intrusions (wrong words)
- Strategy used

# Task Previews

# The 5 Tasks

Follow your **sequence card**.

Each task: ~15 minutes

Work in pairs — swap roles halfway.

# Task 1: Reflex Test

**How fast is your nervous system?**

- Partner drops ruler without warning
- Catch it as fast as you can
- Record the distance (cm)
- 5 trials each

# Task 2: Time Warp

**How accurate is your internal clock?**

- Estimate when 60 seconds pass
- Estimate line lengths (visual)
- Estimate string lengths (touch only)

# Task 3: Sixth Sense

**Can you detect being watched?**

- Sit back-to-back
- Partner flips coin: stare or look away
- Guess which, rate confidence
- 6 trials each

# Task 4: Lady Luck

**How random can you be?**

- Say 20 “random” numbers (1–10)
- Roll die 10 times
- Flip coin 10 times

# Task 5: Frontal Lob

**How well do you know your ability?**

- Rate your throwing (1–10)
- Throw 10 balls at basket
- Compare prediction to reality

# How Tasks Work

1. Check your **sequence card** for task order
2. Go to that task area
3. Complete with your partner
4. **Enter data in Qualtrics**
5. Move to next task on your card

# Begin Tasks!

# Check Your Sequence Card

Find your first task.

Go there now with your partner.

**Task Time: 15 minutes**

**15:00**

# Move to Next Task

Check your sequence card.

Enter data before moving!

**Task Time: 15 minutes**

**15:00**

# Move to Next Task

Check your sequence card.

Enter data before moving!

**Task Time: 15 minutes**

**15:00**

# Move to Next Task

Check your sequence card.

Enter data before moving!

**Task Time: 15 minutes**

**15:00**

# Move to Next Task

Check your sequence card.

Enter data before moving!

**Task Time: 15 minutes (Final)**

**15 : 00**

# Part 2: Wrap-up

# Complete Part 2 Survey

Return to Qualtrics:

- Mood NOW (compare to before)
- Favourite task
- Least favourite task
- Comments

# Pre-Post Design

We measured mood **before** and **after**.

This lets us see if DataLab affected how you feel.

Each person is their own control.

# What Did We Learn?

# Reflex Test

## Physics measures your brain!

- Distance fallen → reaction time
- Typical: 150–250 milliseconds
- Did you improve across trials?

## What might have affected your data?

- Ruler height consistency?
- Anticipation of the drop?
- Partner's technique varied?

 DATALAB  
**REFLEX TEST**  
How fast is your nervous system?

**INSTRUCTIONS**

1. **Partner A** holds ruler at 30cm mark, hanging vertically
2. **Partner B** positions thumb and finger at 0cm — don't touch the ruler!
3. A drops ruler **without warning**
4. B catches it **as fast as possible**
5. Read the cm mark at the **top of your thumb**
6. Complete **5 trials**, then swap roles

**CONVERSION CHART (CM → MILLISECONDS)**

| CM | 1   | 2   | 3   | 4   | 5   | 6   | 7   | 8   | 9   | 10  |
|----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| MS | 45  | 64  | 78  | 98  | 101 | 111 | 120 | 128 | 135 | 143 |
| CM | 11  | 12  | 13  | 14  | 15  | 16  | 17  | 18  | 19  | 20  |
| MS | 150 | 156 | 163 | 169 | 175 | 181 | 186 | 192 | 197 | 202 |
| CM | 21  | 22  | 23  | 24  | 25  | 26  | 27  | 28  | 29  | 30  |
| MS | 287 | 212 | 217 | 221 | 226 | 230 | 235 | 239 | 243 | 247 |

**Formula:**  $RT\ (ms) = \sqrt{(2d \div 9.81)} \times 1000$  where d = distance in metres

 **RECORD YOUR CATCHES (CM)**

Trial 1

Trial 2

Trial 3

Trial 4

Trial 5

Which hand did you use? ☐ Dominant ☐ Non-dominant

# Mind Palace

## Working memory in action

- Miller's “magical number  $7 \pm 2$ ”
- Serial position effect: primacy & recency
- Distraction task interfered with rehearsal

## What might have affected your data?

- Could everyone hear clearly?
- Did you use a strategy (chunking)?
- Was the distraction task equally hard?

 DATALAB

**MIND PALACE**

Memory test materials

---

**STEP 1: DISTRACTOR TASK (DO THIS FIRST, FOR 60 SECONDS)**

Complete as many as you can. This prevents rehearsal of the word list.

|           |           |          |          |           |
|-----------|-----------|----------|----------|-----------|
| 47 + 36 = | 83 - 29 = | 6 × 7 =  | 54 ÷ 9 = | 28 + 45 = |
| 54 + 18 = | 91 - 47 = | 8 × 9 =  | 72 ÷ 8 = | 63 + 19 = |
| 26 + 57 = | 72 - 38 = | 4 × 12 = | 45 ÷ 5 = | 37 + 26 = |
| 63 + 29 = | 85 - 56 = | 7 × 8 =  | 63 ÷ 7 = | 52 + 31 = |
| 38 + 45 = | 64 - 27 = | 9 × 6 =  | 48 ÷ 6 = | 44 + 29 = |
| 52 + 39 = | 93 - 48 = | 5 × 11 = | 81 ÷ 9 = | 67 + 18 = |

**STEP 2: WORD RECALL (WRITE ALL THE WORDS YOU REMEMBER)**

|   |   |   |   |    |
|---|---|---|---|----|
| 1 | 2 | 3 | 4 | 5  |
| 6 | 7 | 8 | 9 | 10 |

Write words in any order — the numbers are just to help you count.

 **TOTAL WORDS RECALLED:** \_\_\_\_\_ / 10

# Time Warp

## Your brain constructs time

- Most people over- or under-estimate
- Touch vs vision — which is better?

## What might have affected your data?

- Did you count in your head?
- When exactly did the stopwatch start?
- Could you see any clocks?

 DATALAB  
**TIME WARP**  
Your brain's internal clock

**TASK A: TIME ESTIMATION**

1. Close your eyes or look down at the desk
2. When you hear "Start", begin sensing time passing
3. Say "Stop" when you believe exactly **60 seconds** have passed
4. Your partner will record your actual time

| <b>TASK B: LINE LENGTH</b>                                                                                                                                                                   | <b>TASK C: STRING LENGTH</b>                                                                                                                                                                               | <b>TASK D: TEMPERATURE</b>                                                                                                                   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| <ol style="list-style-type: none"><li>1. Look at <b>Line A</b> (separate sheet)</li><li>2. Estimate length in cm</li><li>3. Repeat for <b>Line B</b></li></ol> <small>Don't measure!</small> | <ol style="list-style-type: none"><li>1. Feel <b>String 1</b> (loop) without looking</li><li>2. Estimate length in cm</li><li>3. Repeat for <b>String 2</b> (knotted)</li></ol> <small>Touch only!</small> | <ol style="list-style-type: none"><li>1. Without checking any devices</li><li>2. Estimate room temperature</li><li>3. Record in °C</li></ol> |

 **RECORD YOUR ESTIMATES**

|           |          |          |           |           |          |
|-----------|----------|----------|-----------|-----------|----------|
| Time:     | Line A:  | Line B:  | String 1: | String 2: | Temp:    |
| ----- sec | ----- cm | ----- cm | ----- cm  | ----- cm  | ----- °C |

# Sixth Sense

## Can you detect being watched?

- Chance = 3 out of 6 correct
- Signal detection: hits, misses, false alarms

## What might have affected your data?

- Peripheral vision leakage?
- Sound cues from your partner?
- Response bias (saying “yes” more)?

 DATALAB

**SIXTH SENSE**  
*Can you feel when someone is watching?*

INSTRUCTIONS

1. **TARGET** sits with back to partner, eyes closed

2. **STARER** flips a coin: **Heads** = stare at back of partner's head; **Tails** = look away

3. Hold for **15 seconds**, then tap partner's shoulder

4. Target says "**Staring**" or "**Not staring**" and rates confidence

5. Starer reveals the answer; record if correct

6. Complete **6 trials** as target, then swap roles

RECORDING SHEET

| Trial | Actual                                                        | Your Guess                                                    | Confidence | Correct?                                              |
|-------|---------------------------------------------------------------|---------------------------------------------------------------|------------|-------------------------------------------------------|
| 1     | <input type="checkbox"/> Staring <input type="checkbox"/> Not | <input type="checkbox"/> Staring <input type="checkbox"/> Not | 1 2 3 4 5  | <input type="checkbox"/> ✓ <input type="checkbox"/> ✗ |
| 2     | <input type="checkbox"/> Staring <input type="checkbox"/> Not | <input type="checkbox"/> Staring <input type="checkbox"/> Not | 1 2 3 4 5  | <input type="checkbox"/> ✓ <input type="checkbox"/> ✗ |
| 3     | <input type="checkbox"/> Staring <input type="checkbox"/> Not | <input type="checkbox"/> Staring <input type="checkbox"/> Not | 1 2 3 4 5  | <input type="checkbox"/> ✓ <input type="checkbox"/> ✗ |
| 4     | <input type="checkbox"/> Staring <input type="checkbox"/> Not | <input type="checkbox"/> Staring <input type="checkbox"/> Not | 1 2 3 4 5  | <input type="checkbox"/> ✓ <input type="checkbox"/> ✗ |
| 5     | <input type="checkbox"/> Staring <input type="checkbox"/> Not | <input type="checkbox"/> Staring <input type="checkbox"/> Not | 1 2 3 4 5  | <input type="checkbox"/> ✓ <input type="checkbox"/> ✗ |
| 6     | <input type="checkbox"/> Staring <input type="checkbox"/> Not | <input type="checkbox"/> Staring <input type="checkbox"/> Not | 1 2 3 4 5  | <input type="checkbox"/> ✓ <input type="checkbox"/> ✗ |

Confidence: 1 = pure guess, 5 = absolutely certain

 TOTAL CORRECT: \_\_\_\_\_ / 6

# Lady Luck

## Humans are bad at random!

- We avoid repeating numbers
- Real randomness has streaks
- Gambler's fallacy: coins don't remember

## What might have affected your data?

- Number preferences (7 is popular!)
- Did you try to “be random”?
- Were dice/coins recorded accurately?

DATALAB

LADY LUCK

Can humans be truly random?

---

**TASK A: GENERATE 20 "RANDOM" NUMBERS (1-10)**

Say each number aloud as it comes to mind — *don't plan ahead!*

|                      |                      |                      |                      |                      |                      |                      |                      |                      |                      |
|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| 1                    | 2                    | 3                    | 4                    | 5                    | 6                    | 7                    | 8                    | 9                    | 10                   |
| <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |
| 11                   | 12                   | 13                   | 14                   | 15                   | 16                   | 17                   | 18                   | 19                   | 20                   |
| <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |

**TASK B: ROLL THE DICE 10 TIMES**

|                      |                      |                      |                      |                      |                      |                      |                      |                      |                      |
|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| 1                    | 2                    | 3                    | 4                    | 5                    | 6                    | 7                    | 8                    | 9                    | 10                   |
| <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |

How many 6s did you roll?  (By chance, you'd expect about 1-2)

**TASK C: FLIP THE COIN 10 TIMES**

Record H (heads) or T (tails):

|                      |                      |                      |                      |                      |                      |                      |                      |                      |                      |
|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| 1                    | 2                    | 3                    | 4                    | 5                    | 6                    | 7                    | 8                    | 9                    | 10                   |
| <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> | <input type="text"/> |

Total Heads:  Longest run of same outcome:

# Frontal Lob

## How well do you know yourself?

- Calibration = prediction vs reality
- Metacognition: thinking about thinking

## What might have affected your data?

- How was “success” defined?
- Self-serving bias in ratings?
- Was throwing distance consistent?

 **FRONTAL LOB**  
*Precision meets confidence*

**INSTRUCTIONS**

1. **Before throwing:** Rate your ball-throwing ability (1 = terrible, 10 = excellent)
2. Stand at the marked line
3. Throw ping pong balls at the target
4. Complete **10 throws** with your dominant hand
5. Count how many hit the target
6. *Optional:* Try 5 throws with your non-dominant hand

 **RECORD YOUR DATA**

|                            |                                   |                                 |                                                                                         |
|----------------------------|-----------------------------------|---------------------------------|-----------------------------------------------------------------------------------------|
| Self-rating:<br>----- / 10 | Dominant hand hits:<br>----- / 10 | Non-dominant hits:<br>----- / 5 | Which hand is dominant?<br><input type="checkbox"/> Left <input type="checkbox"/> Right |
|----------------------------|-----------------------------------|---------------------------------|-----------------------------------------------------------------------------------------|

# Why This Matters

**Collecting data is hard.**

These challenges are why researchers:

1. Use **standardised procedures**
2. Define variables **operationally**
3. **Train testers** for consistency
4. **Control the environment**

When we analyse your data, we'll consider these factors.

# Data Collected Today

| Task        | Variables                             |
|-------------|---------------------------------------|
| Memory      | Words recalled, positions, intrusions |
| Reflex      | Reaction times (5 trials)             |
| Time Warp   | Time, visual, tactile estimates       |
| Sixth Sense | Detection accuracy, confidence        |
| Lady Luck   | Number patterns, dice, coins          |
| Frontal Lob | Self-rating, actual performance       |
| Pre/Post    | Mood, energy, stress                  |

# Summary

# What We Did Today

1. Completed surveys (mood, personality)
2. Memory test together
3. 5 tasks as participant and tester
4. Experienced variability firsthand
5. Created pre-post design

# Next Week

## **Week 12: Your First Lecture**

Wednesday 10:00–12:00

- Analyse DataLab results together
- Introduction to distributions
- Your data = teaching examples

See you Wednesday!
